RANDRIANARISON MENDRIKA

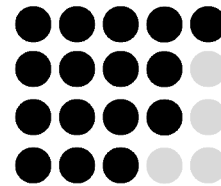

FULLSTACK DEVELOPER

PROFIL

I'm a junior developer with a passion for creating innovative software solutions. My recent experience has enabled me to develop solid skills in web development and REST API creation. I'm particularly enthusiastic about taking on new challenges and learning new technologies. My professional goal is to contribute to stimulating projects and to continue honing my development skills.

SKILLS

- Java, spring mvc, spring boot
- javascript, React
- Mysql, Postgres
- Php, codeIgniter, Symfony

EXPERIENCES

- **January 2024 - current: FullStack Developer at Ibonia**

- Fullstack developer on fintech projects using Java and Spring Boot.
- Creation of a robust Rest API to enable seamless integration with other systems...
- Implementation of a money distribution platform, via bank intervention, in Php code igniter, and Java.
- Backend developer for a restaurant reservations and management application, in Php with Symfony for global processing, and also NodeJs for automations.and Neo4J.

- **August 2023 - December 2023: Spring boot React fullStack developer internship at Ibonia**

Design and development of a Core Banking System application to meet the company's specific needs.
