Video games

EXPÉRIENCES

08/2023 – now
Ibonia

FULLSTACK DEVELOPER
- Development of several fintech projects such as a contribution platform integrating a chatbot and an internal core banking system.
- Development and maintenance of a money distribution platform, processing bank files, which has helped to increase the number and types of transfers processed by bank branches, in PHP codeIgniter, Java Spring Boot and Mysql.
- Development of a restaurant booking and ordering software, taking charge of the maintenance and improvement of the payment module, including the integration of Stripe for a smooth and secure transaction experience, as well as delivery, in PHP Symfony, NodeJs and Neo4J.

07/2024 – 09/2024
Freelance

BACKEND DEVELOPER
- Development of an interactive training platform with quizzes, tests, documentations and summaries for users, incorporating a fun dimension thanks to a gamified approach, all produced with Java Spring Boot and React.
